Notes: *a) Annual actual take from regulated rivers and watercourses*

*The annual diversion data includes interstate trade. For example, where water is traded from NSW to South Australia, the diversions are reported in South Australia*

*The annual diversion data excludes losses due to conveyance along the river to the point of offtake, but for irrigation areas, it includes conveyance losses from the point of river offtake to run in supply channels*

*(b) Murray Irrigation Limited (MIL)*

*(c) Western Murray Irrigation (WMI)*

*(d) Other refers to regulated diversions excluding MIL and WMI*

*(e) NSW Murray - WMI diversion for 2012-13 has been revised up by 29.119GL, as per revised data*

**Table 2: Cross-check of Victorian Murray in Table 1 with data published in Cap Register: *https://www.mdba.gov.au/publications/mdba-reports/cap-compliance-reports***
